Profile

VAPT professional with 3 years of hands-on experience conducting security assessments across web applications, APIs, networks, and OT/IT environments. Experienced in identifying and manually validating vulnerabilities, assessing their real-world impact, and working with clients and technical teams to drive effective remediation and improve overall security posture.

Achievements

Recognized by NASA under their Vulnerability Disclosure Program (VDP)

Acknowledged by the National Aeronautics and Space Administration (**NASA**) for responsibly identifying and reporting a previously unknown vulnerability, contributing to the security of NASA's digital assets. Received an official appreciation letter from NASA's Senior Agency Information Security Officer (SAISO).

Professional Experience

VAPT Consultant (*DievasTechnologies Pvt. Ltd*)

Noida, U.P 08/2025 – Present

- Led end-to-end Vulnerability Assessment & Penetration Testing (VAPT) across web applications, APIs, internal infrastructure, and OT-integrated systems, identifying critical attack paths and security weaknesses.
- Managed and coordinated OFFPST and OLPST engagements, conducting practical attack simulations and vulnerability exploitation aligned with CERT-In expectations and compliance standards.
- Executed network and internal penetration testing, including firewall rule review, segmentation validation, credential-based attack scenarios and privilege escalation, and privilege escalation scenarios within enterprise and OT-connected environments.
- Delivered audit-ready technical reports with CVSS-based risk ratings, proof-of-concept (PoC) evidence, business and technical impact analysis, and clear remediation guidance aligned with CERT-In and industry standards.
- Acted as VAPT SPOC, coordinating with clients, internal teams, and external stakeholders to validate fixes, support re-testing, and ensure timely closure of high-risk vulnerabilities.

VAPT Specialist (*DievasTechnologies Pvt. Ltd*)

Noida, U.P 10/2024 – 08/2025

- Performed manual exploitation and validation of OWASP Top 10 and infrastructure vulnerabilities, including XSS, SQL Injection, IDOR, authentication bypass, and security misconfigurations.
- Conducted web application VAPT with a focus on authentication, authorization, access control, session management, input validation, and application security controls.
- Performed vulnerability assessments using Tenable Nessus, configuring authenticated and unauthenticated scans to identify vulnerabilities, outdated software, missing patches, insecure configurations, and exposed services across network environments.
- Manually validated Nessus findings to distinguish genuine vulnerabilities from false positives, assessed their security impact, and used the results to support CVSS-based risk prioritization, remediation, and re-testing.
- Prepared detailed VAPT reports with risk-based severity ratings and actionable remediation guidance, aligned with OWASP and industry security practices.

Cyber Security Analyst (*Riskberg Consulting Pvt. Ltd*)

Gurugram, Haryana 09/2023 – 08/2024

- Performed manual and automated Vulnerability Assessment & Penetration Testing (VA/PT) on multiple client web applications, ensuring comprehensive coverage and timely delivery.
- Managed on-site VAPT engagements for a client over an extended period, overseeing end-to-end testing activities

and acting as the primary point of contact for coordination and communication.

- Executed internal penetration testing on clients’ in-house applications and enterprise network environments to identify and mitigate security weaknesses.
- Identified, validated, and classified vulnerabilities using risk-based severity ratings (Critical, High, Medium, Low), supported by clear proof-of-concept (PoC) evidence.
- Collaborated closely with development and engineering teams to validate fixes, support remediation efforts, and improve overall security posture.

Certifications

- **Certified Ethical Hacker (Practical) EC-**
Council | Apr 2024 – Apr 2027 Credential
ID: **ECC2386741059**

[ECCOUNCIL](#)
- **Certified Network Security Practitioner (CNSP)**
The SecOps Group | Issued: Jun 2024 Credential ID:
8813850

[The SecOps Group](#)
- **Certificate of Paper Presentation**
Title: "Comparative Analysis of Cryptographic Algorithms in Computer Networks" Issued: May
2023

Education

Master of Computer Applications (MCA)	Sep ’21-Jul ’23
Lovely Professional University Phagwara, IN	CGPA 7.4
Bachelor of Computer Applications (BCA)	Jun ’18-Aug ’21
University of Lucknow Lucknow, IN	Percentage 69.1

Skills

- **CORE SKILLS:**
- **VAPT:** Web Application, API, Network, Internal/External, OT/IT & OT/SCADA, Android Security Testing
- **Application Security:** OWASP Top 10, Authentication & Authorization, Access Control, Business Logic, XSS, SQL Injection, IDOR, CSRF, Security Misconfiguration
- **Exploitation:** Manual Exploitation, Vulnerability Validation, Authentication Bypass, Privilege Escalation
- **Mobile Security:** Android Pentesting, Root Detection Bypass (Frida), Runtime Manipulation, Frida
- **Standards & Risk:** CVSS, CERT-In, Risk-Based Vulnerability Prioritization
- **Tools:** Burp Suite, Nmap, Nessus, SQLMap, Gobuster, Dirsearch, Acunetix ,Frida
- **Professional:** Risk Assessment, Client Coordination, VAPT Engagement Management, Technical Report Writing, PoC Development, Remediation Validation & Re-testing
